

epigenetics

Official Journal of the Epigenetics Society

Epigenetics is the first peer-reviewed, Medline-indexed journal to focus exclusively on the fascinating field of epigenetics. As a multidisciplinary journal, *Epigenetics* publishes original research and scholarly review articles covering this scientific discipline in its broadest interpretation, providing a forum where epigenetic mechanisms involved in medical and biological processes can be discussed. Published once a month, in print and online, *Epigenetics* strives to offer rapid turnaround times from submission through peer-review to publication. Our goal is to establish *Epigenetics* as the lead journal in the field.

Epigenetics 2010 Impact Factor: 4.622

TYPE OF PAPERS:

**ORIGINAL RESEARCH • REVIEW ARTICLES • BRIEF REPORTS •
• POINTS-OF-VIEW • MEETING REPORTS**

If you have interesting data, an original hypothesis or timely commentaries on significant developments related to the topics covered by *Epigenetics*, please see our submission guidelines:
